PROFESSIONAL PROFILE

2026 KTU Program Systems graduate and SKILLED FinTech Talent Programme alumnus with hands-on experience developing and testing an internal telecommunications data processing and reporting system for Amber Grid. Worked across .NET, SQL Server, React and Vite, with automated testing using xUnit and Vitest. Completed System Testing coursework at Hamburg University of Technology with practical pytest work.

TECHNICAL SKILLS

Testing & QA: manual testing fundamentals; test design; unit, integration and API testing concepts; coverage; defect investigation; xUnit; Vitest; pytest

Programming: C#, .NET, JavaScript, React, Python, HTML, CSS

Data & tools: SQL Server, SQL, Git, GitHub, Vite, ChatGPT API

Engineering: requirements clarification, data processing, report generation, full-stack development, automated testing

EDUCATION

Kaunas University of Technology (KTU) | Bachelor's Degree in Program Systems 2022–2026

- **Bachelor project:** internal telecommunications data processing and report generation system developed for AB Amber Grid.
- Built a production-ready full-stack solution using .NET, SQL Server, React and Vite; clarified requirements directly with the client.
- Implemented automated testing with xUnit and Vitest. The project was praised for its practical value and thorough testing.
- **SKILLED FinTech Talent Programme alumnus:** selected for a specialised KTU Talent Academy programme completed alongside the degree, with additional FinTech studies, challenge-based projects and career-development activities.

Hamburg University of Technology (TUHH), Germany | Erasmus exchange Apr 2025–Aug 2025

- Completed a System Testing course with hands-on pytest exercises and practical work with testing methods.

RELEVANT EXPERIENCE

AB Amber Grid | Software Engineer Intern Feb 2026–Jun 2026

- Developed the internal system used as the bachelor project, covering backend, frontend, database and reporting functionality.
- Worked with .NET, SQL Server, React and Vite to process telecommunications data and generate internal reports.
- Verified system behavior through automated tests, data validation and systematic investigation of edge cases and failures.

AB Swedbank | Data Analyst, Shadow Practice Mar 2023–May 2023

- Worked with databases, created reports and graphs, and interpreted results.

SELECTED IT PROJECTS

Innovation Workshop | Programmer Oct 2023–Dec 2023

- Built an AI-based tool in a team using Python, HTML, JavaScript and the ChatGPT API.

EdTech Hackathon | Participant Apr 2024

- Developed and presented the concept for an educational solution.

Miscellaneous Projects

- **SlimeSoccer** – Java multiplayer game developed for a university task
- **ML project** – a python project created for training and comparing different ML models for predicting vessel positions.

ADDITIONAL EXPERIENCE & ACTIVITIES

Customer-facing roles: Sales Consultant, UAB ALG Knygynai (Jul–Sep 2024); Manager's Assistant, UAB Ital Inox (Jul–Sep 2023)

Leadership & volunteering: Creative workshop support at JAPOKO (2015–present); squad leadership and timetable preparation at the Young Astronomers' Summer Camp (2022–present)

LANGUAGES & INTERESTS

Languages: Lithuanian – native; English – C1; Japanese – A2; German – A2

Interests: guitar, kendo, video editing
