

RECOMMENDATION

Arijus Vaškiavičius is a graduate of Kaunas University of Technology, who has been actively participating in the SKILLED FinTech programme of the Talent Academy since the first year of his bachelor's studies. SKILLED FinTech is a specialised talent development programme of Kaunas University of Technology, which provides competencies for a career in the financial technology (FinTech) sector and enables talented students to develop and use their skills, and apply the acquired knowledge in the fields of studies, research and business. The SKILLED FinTech Talent Development Programme also helps to develop a range of personal competencies to be competitive in the labour market.

Arijus participated in informal education activities, interdisciplinary projects and hackathons. In these events and projects, he has collaborated with business people from various fields, working together to develop innovative solutions. Each semester, he set individual goals and with the help of staff and mentors at Kaunas University of Technology Career and Service Centre, **Arijus** was continuously improving his personal and professional competencies.

Studying according to the enhanced study plan, **Arijus** acquired the competencies required for the FinTech market in the areas of programming, data analytics and finance.

Participation in the Talent Academy's SKILLED FinTech programme has provided **Arijus** with the competencies needed for the labour market, such as problem-solving, time management, leadership, creativity, organisation and public speaking. SKILLED FinTech has strengthened teamwork, flexibility skills and interdisciplinary knowledge by working with students from various study programmes. By interacting with business representatives, **Arijus** acquired and improved business communication skills.

I believe that the experience and competencies developed during the SKILLED FinTech programme activities will provide a solid foundation for the future professional activities of **Arijus Vaškiavičius**.
